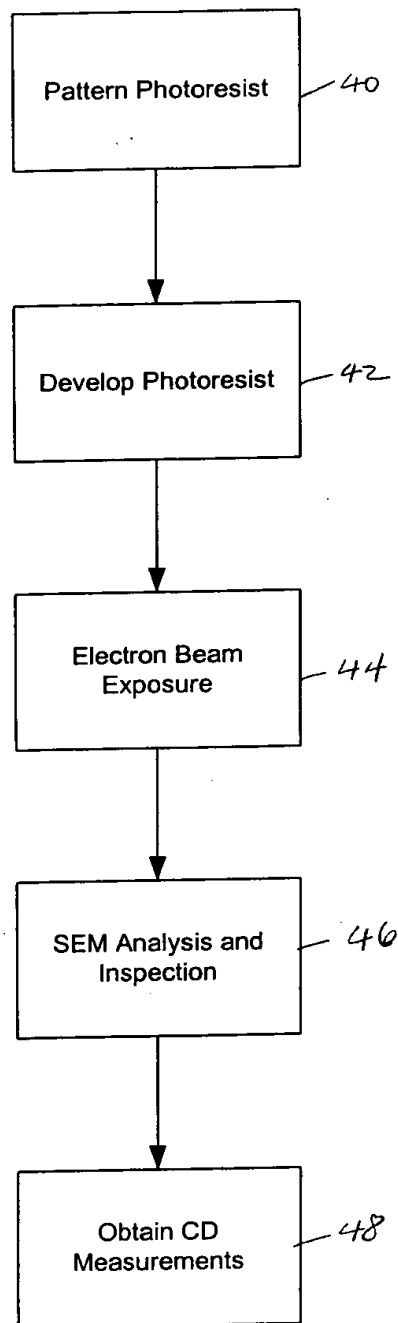

FIG. 1

The diagram illustrates a light source assembly 12. At the top, a light source 14 emits light through a series of three downward-pointing arrows. This light passes through a rectangular block labeled 'Optics' 16. A second set of three downward-pointing arrows indicates the light's path through a component 18, which features a series of vertical bars 34 and a sub-label 32. The light then passes through another rectangular block labeled 'Optics' 20. A final set of three downward-pointing arrows shows the light entering a stack of four horizontal layers. These layers are labeled 22 (bottom), 26, 28, and 30 (top). An arrow labeled 24 points to the left of this stack.
